

# NIRUPAM CHANGMAI

## Full-Stack Developer · AI Engineer

Guwahati, Assam, India (remote-ready, works US hours) | [LinkedIn](#) | [github.com/nirupamc](https://github.com/nirupamc) | [nirupamchangmai99@gmail.com](mailto:nirupamchangmai99@gmail.com) | [neerruu.vercel.app](https://neerruu.vercel.app)

### SUMMARY

Full-stack developer and AI engineer; building for 5+ years — freelancing since college, 2+ years in professional roles. I ship production applications end-to-end: React, TypeScript, Next.js, Node.js, Python, GraphQL. Professional LLM integrations (OpenAI, Anthropic, Gemini): prompt engineering, function calling, RAG. MCA with ML & AI specialization; proven in remote, async teams.

### EXPERIENCE

#### Senior Software Developer — TanTech LLC

Jan 2026 – Present · Remote (USA)

- Architected and shipped 3 React/TypeScript/Next.js applications end-to-end — including an internal employee-work dashboard, a QR-based attendance PWA with geolocation and leave workflows, and an autonomous job-application agent — with zero critical bugs in 6 months of production.
- Designed AI integrations across OpenAI, Anthropic, and Gemini APIs: prompt pipelines, function calling, and structured response parsing that automate business workflows.
- Integrated 5+ GraphQL/REST APIs into responsive interfaces, cutting data-fetch latency 40% via query optimization and async patterns.
- Built a reusable component library and design system adopted across all 3 products, reducing UI development time 45%; improved app performance 35% (code splitting, lazy loading, memoization); maintained CI/CD on GitHub Actions.

#### Web & Digital Operations — XO Clothing

Jul 2025 – Jan 2026 · On-site

- Rebuilt the company website for performance and cross-device compatibility — +25% organic traffic in 4 months.
- Produced social content across 3 platforms — 10M+ views in a single month, +18% followers; cut client-communication turnaround 40%.

#### Freelance Developer & Brand Operations — Self-employed / Watawi

Jan 2025 – Jul 2025 · Remote

- Delivered 4 full-stack projects end-to-end (Python, TypeScript, React, Next.js) — architecture, AI integration (OpenAI, Gemini prompt pipelines and function calling), testing, and cloud deployment for each client independently.
- Managed product development and manufacturing for the Watawi apparel brand: drops, vendor coordination, sampling, and QC — design file to shipped garment.

#### Full-Stack Developer — Riyum Innovations Pvt Ltd

Mar 2024 – Jan 2025 · Guwahati

- Owned the full feature lifecycle of a production LMS (React, TypeScript, GraphQL) serving 120+ users with zero downtime, from architecture through CI/CD deployment.
- Built a real-time internal communication platform (React, Node.js, WebSockets) supporting 30+ concurrent users, replacing 2 third-party tools and cutting team response time 35%.
- Wrote unit/integration tests (Jest, React Testing Library) that caught 15 critical bugs pre-release; created a component library that cut new-feature development time 45%.
- Also shot/edited 25+ social videos, designed 30+ branded assets; trained in screen printing and color separation.

Earlier: freelance web projects alongside studies, 2020–2024.

### SELECTED PROJECTS

- [ThriftBazaar](#) — multi-vendor thrift marketplace: vendor storefronts, Razorpay checkout, real-time drop alerts (Socket.io), admin panel (TypeScript, Node.js). Live demo on repo.
- [NERV-Orbital](#) — WebGL satellite tracker: 500+ live satellites from real Celestrak TLE data, SGP4 propagation (Three.js, React, TS).
- [VS Code Portfolio](#) — pixel-faithful VS Code clone in React/Vite: working terminal, theme system, embedded AI assistant panel. A live demo of my frontend + AI-integration work.
- [PWA Attendance](#) — offline-capable attendance: QR clock-in/out, geolocation, leave workflows (built for TanTech).
- [Auto-Apply](#) — autonomous LLM agent that parses job postings and fills applications (in development).

### SKILLS

- **Languages & Frameworks:** JavaScript (ES6+), TypeScript, Python, React, Next.js, Node.js, GraphQL, Tailwind CSS, WebSockets, Three.js/WebGL
- **AI / LLM:** OpenAI, Anthropic (Claude), Gemini APIs · prompt engineering · function/tool calling · RAG · structured output parsing
- **Cloud & Tooling:** PostgreSQL (Supabase, Neon), AWS, GCP, Azure, Docker, GitHub Actions (CI/CD), Jest, React Testing Library, Vite, Figma
- **Design & Production:** Photoshop, Illustrator, video editing, screen printing, color separation, apparel manufacturing coordination

### EDUCATION & CERTIFICATIONS

- **MCA, Machine Learning & AI Specialization** — Amity University Online, 2023–2025
- **BCA** — Girijananda Chowdhary University, 2020–2023 · Certs: JPMorgan Chase SWE, freeCodeCamp
